

## Lakeland Computers

### Job Specification

- Job Title:** Software Developer
- Location:** Irvinestown, Co. Fermanagh, Northern Ireland.
- Reports to:** Managing Director
- Post Type:** Permanent
- Hours:** 40 Hours per week. 9:00 a.m. to 6:00 p.m. Monday to Friday
- Salary:** £25,000 - £30,000 per year DOE
- Abstract:** The successful candidate will work in a small team of experienced software engineers developing commercial applications primarily for the independent retail sector.
- Job Role:** Lakeland Computers have an established reputation for delivering quality solutions to the retail sector across the U.K. & Ireland stretching back over 13 years. To support our growth, we are looking for a .NET software developer to work on both new and existing cutting edge technology projects within the context of the independent retail sector and its supply chain. This is a role that will require the individual to be a disciplined and conscientious software developer, with experience of .NET (C#) and SQL Server. Our dynamic, team-based environment requires commitment and hard work to ensure we continue to deliver quality solutions. Applicants should be eager to progress and develop both their technical and personal skills.

*The position requires an ability and willingness to:*

- i. produce functional and technical specifications in accordance with customer and project team input;
- ii. develop effective user interfaces;
- iii. understand the interaction between users and processes;
- iv. develop software to internal coding practices and standards;
- v. prepare support and release documentation for other developers, end users and support staff;
- vi. provide support to LCCS customers and staff;
- vii. liaise with testing personnel and to unit test software in accordance with LCCS quality standards;
- viii. diagnose problems and produce software fixes;
- ix. work within agreed time constraints;
- x. perform any other appropriate duties as and when required.

## **KEY SKILLS**

### Required

- i. Possess 3+ years experience in application development on Microsoft Windows platforms (.NET 2.0 & 3.5 (C#), Visual Studio)
- ii. Have a good knowledge of SQL Server 2005 & 2008
- iii. Full Software Lifecycle experience

### Desirable

- i. Experience with Issue Tracking and Problem Resolution; (E.g. OnTime)
- ii. Experience in software testing and unit testing software; (E.g. N-Unit)
- iii. Experience with Multi-Threaded and Socket programming;
- iv. Experience with Source Control Tools; (E.g. Visual SourceSafe, Source Anywhere)
- v. Microsoft SQL Server Analysis Services;
- vi. Microsoft SQL Server Integration Services.
- vii. Microsoft SQL Server Reporting Services;
- viii. Delphi 5 and later;
- ix. Experience of developing handheld applications;
- x. C# for .NET Compact Framework on WinCE;
- xi. Experience of Web Services;

### Personal

- i. A solid understanding in developing commercial software.
- ii. Strong Analytical Skills.
- iii. Excellent written and communication skills.
- iv. Project Management Experience.
- v. Attention to detail.
- vi. Tenacity & Patience.
- vii. Flexible Attitude - Ability to work under pressure and time constraints.
- viii. A commitment to quality.
